

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of: **BALLATO et. al**

Application Serial No.: **10/669,282**

5 Application Filed: **September 24, 2003**

Attorney Docket No.: **CECOM 5501**

For: **ELECTRODE-FREE RESONATOR STRUCTURES FOR FREQUENCY
CONTROL, FILTERS AND SENSORS**

10

AMENDMENTS TO THE SPECIFICATION

Delete the paragraph at page 4, line 18-page 5, line 4, and replace the deleted paragraph with the following replacement paragraph:

BRIEF DESCRIPTION OF THE DRAWINGS

15

FIG'S 1A-1D are graphs illustrating various aspects of the relationship between decreased resonator thickness and motional impedance in a resonator with a thickness, t_2 , of 1.65 μm ;

20

FIG'S 2A-2D are graphs illustrating various aspects of the relationship between decreased resonator thickness and motional impedance in a resonator with a decreased thickness, t_2 , of 1.53 μm ;

FIG'S 3A-3C are top, cross sectional and bottom views of a double-sided electrode-free resonator in accordance with the present invention;

FIG'S 4A-4B-4C are top, cross sectional and bottom views of a single-sided electrode-free resonator in accordance with the present invention;

25

FIG'S 5A-5B-5C are top, cross sectional and bottom views of an double-sided electrode-free filter structure in accordance with the present invention;

FIG'S 6A-6B-6C are top, cross sectional and bottom views of a single-sided electrode-free filter structure in accordance with the present invention; and

30

FIG'S 7A-7B are top and cross-sectional views of another electrode-free resonator in accordance with the present invention having a circular resonator area.
